

As VISVANA, we have adopted the general purpose of complying with the provisions of the environmental legislation in our activities, reducing these effects by keeping the environmental effects under control, continuously improving our environmental performance and leaving a livable clean environment for future generations.

The main principles of our Environmental Policy are;

- Using all the possibilities of sustainable development at the maximum level,
- Ensuring continuous development and improvement by meeting all legal and customer requirements related to environmental aspects
- Detecting pollution at its source and minimizing pollution,
- Organizing trainings in order to spread environmental awareness,
- To encourage natural resource saving measures in all our operations with the aim of preventing climate changes and global warming,
- To monitor, measure and continuously improve the performance and effectiveness of the environmental management system.
- Adhere to the provisions of laws and regulations related to the environment, To comply with the changes made in the legislation,
- Considering the environmental effects in plant and process design,
- Continuously develop and improve its environmental goals and objectives,
- To carry out studies for the reduction, reuse and recycling of wastes.

Continuous improvement of our Environmental Management System is a responsibility shared by all our employees under the leadership of senior management. All of our employees, suppliers and 3rd party organizations act in cooperation to achieve the goals in this policy.
